A MESSAGE FROM BOB TANNER, PRESIDENT/CEO:

In life, change is expected. The health care industry is going through considerable change. Increased emphasis on collaboration, quality outcomes, regulatory compliance, transparency and fiscal responsibility, coupled with the implementation of the Affordable Care Act and expansion in use of health information technology, is transforming how and where health care is delivered.

Throughout the past year, Greater Elgin Family Care Center upgraded infrastructure to maximize these opportunities. As a result, the number of people served was increased while simultaneously improving our outcomes and remaining financially viable.

With our plans clear and our capable staff aligned and well-trained, I’m very confident that not only will we remain a premier provider of quality, affordable primary health care, but an organization that is a leader on the new health care landscape as well.

Thank you for your ongoing support of Greater Elgin Family Care Center!

Bob Tanner
